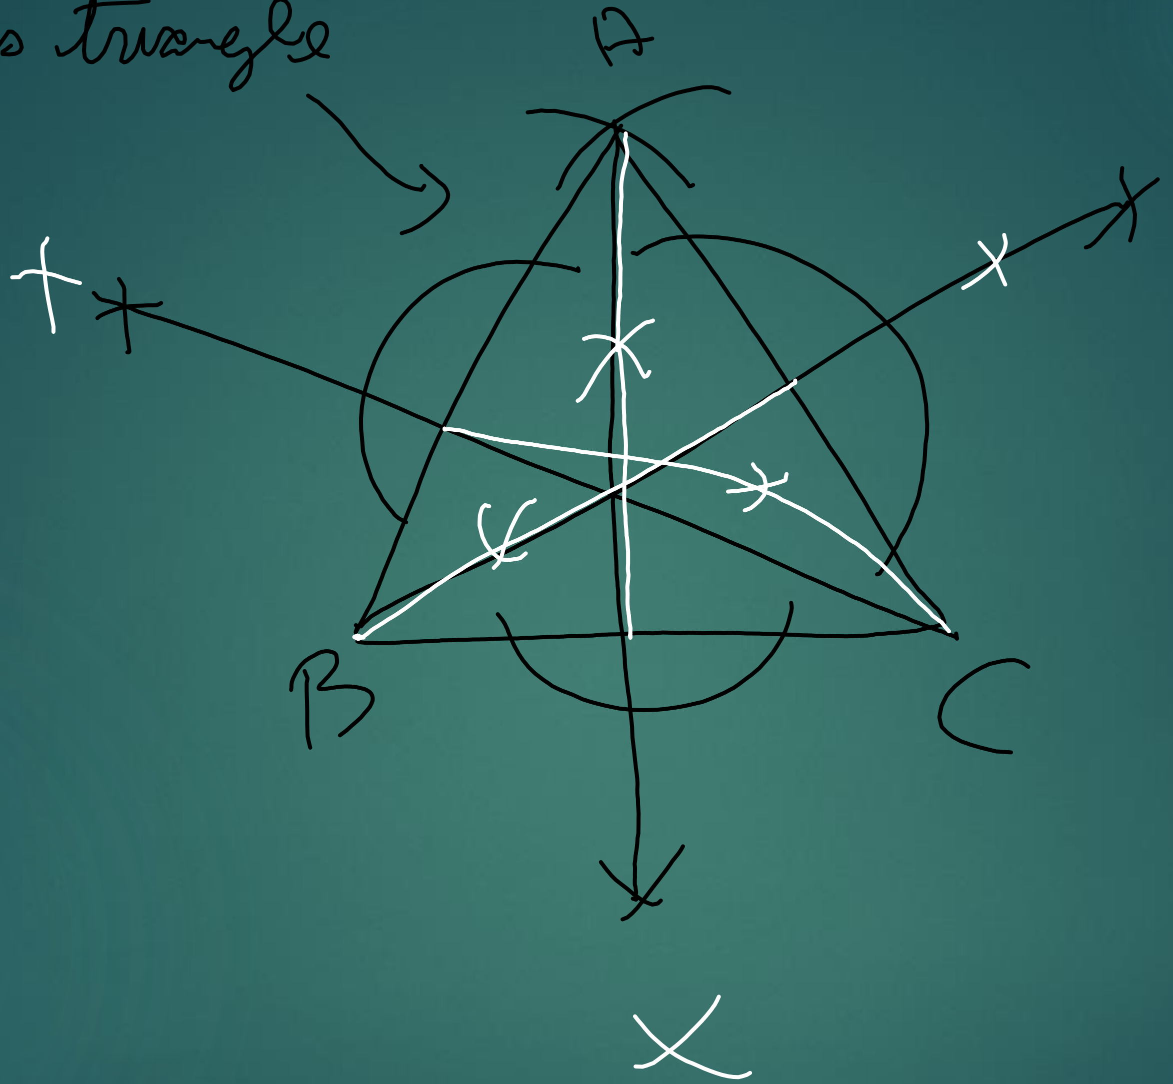
Isosceles triangle



₹2

FV ₹10

$\Downarrow$ 20₹ Profit

$\boxed{₹30}$ MV

$MV > FV \Rightarrow$ premium

$MV = FV \Rightarrow$ par

$MV < FV \Rightarrow$ discount

$\frac{10}{100} \times 100$ — $\boxed{ROR}$

$\boxed{110}$

$\boxed{k = x \times y}$

$= 480$

$k = x \times y$

$480 = x \times 7\frac{1}{2}$

$480 \div \frac{15}{2} = x$

$x = \frac{\overset{32}{\cancel{480}} \times 2}{\cancel{15}}$

$= 64$

Total Investment = No of shares × MV

$= 50 \times 80$

$= 4000$ ₹

D = 20%

D income = 20% of 100

solutions

= 20 ₹

$\text{Return} = \frac{\text{D income}}{\text{Invest}} \times 100$

$= \frac{\cancel{20} \times \cancel{50}^{2.5}}{\cancel{4000}} \times 1\cancel{00} = 25\%$
