Academic Conquest - VIII

Subject: Geography (NCERT) – Ch 9 Resources; Ch 10 Land, Soil, Water, Natural Vegetation and Wildlife Resources

Time: 1 Hour **Max. Marks: 30**

General Instructions: *(1) All questions are compulsory. (2) The paper has four sections – A, B, C and D. (3) Internal choice is given in Section C.*

SECTION A – Multiple Choice Questions (1 mark each) **6**

1. Which of the following is a human-made resource?
   (a) Iron ore (b) Bridge (c) Sunlight (d) Water
2. Resources which are found everywhere, such as air, are called ..... resources.
   (a) ubiquitous (b) localised (c) potential (d) human
3. Which of the following is a non-renewable resource?
   (a) Wind (b) Sunlight (c) Water (d) Coal
4. The removal of the top layer of soil by wind or running water is called ..... .
   (a) weathering (b) afforestation (c) soil erosion (d) reclamation
5. Mangrove forests in India are found mainly in ..... .
   (a) Thar Desert (b) Sundarbans (c) Western Ghats (d) Aravalli Hills
6. Teak and sal are trees of the ..... forests.
   (a) tropical deciduous (b) tropical evergreen (c) thorny (d) mountain

SECTION B – Very Short Answer Questions (2 marks each; answer in about 30–40 words) **8**

7. What is meant by sustainable development?
8. Differentiate between renewable and non-renewable resources. Give one example of each.
9. Name any two factors that determine the use of land.
10. Why is the conservation of natural vegetation and wildlife necessary? Give any two reasons.

SECTION C – Short Answer Questions (4 marks each; answer in about 80 words) **12**

11. 'Resources are a function of human activities.' Explain this statement.

OR

Distinguish between actual resources and potential resources with examples.

12. Explain any four methods of conserving soil.

OR

What are the factors responsible for the formation of soil?

13. Describe the features of tropical deciduous forests. Name any two trees found in these forests.

OR

Why are mangrove forests important? Where are they found in India?

SECTION D – Case-Based Question (4 marks) **4**

Read the passage and answer the questions that follow.

The villagers of Khandala depend on wells and borewells for water. Over the years, farmers have dug deeper borewells to irrigate their fields, and the water level has fallen sharply. Most of the monsoon

rain flows away over the surface of the land and is wasted. Seeing this, the local school built pipes on its roof to collect rainwater and store it in an underground tank. The students also planted trees around the school and convinced villagers to stop wasting water.

14. (i) Why has the water level in the village fallen? [1]
    (ii) What is the method used by the school to collect rainwater called? [1]
    (iii) Suggest any two other ways in which the villagers can conserve water. [2]
