Class VIII | Maths Worksheet | Percentage

Section A: Understanding Percentages

1. Convert into percentages:

(i) 3/8

(ii) 0.045

(iii) 7/20

2. Convert into a fraction in simplest form and into a decimal:

(i) 12.5%

(ii) 140%

3. Find:

(i) 15% of 480

(ii) 6.5% of 800

4. What percent of 2.5 kg is 400 g?

5. 40% of a number is 96. Find the number.

Section B: Increase, Decrease, Profit, Loss and Discount

6. The population of a town was 25,000. It increased by 12% in one year. Find the population at the end of the year.

7. The price of a shirt was reduced from ₹800 to ₹680. Find the percentage decrease in the price.

8. Meera bought a bicycle for ₹2,400 and sold it at a profit of 15%. Find the selling price.

9. A radio was sold for ₹1,980 at a loss of 12%. Find its cost price.

10. A jacket is marked at ₹1,500. The shopkeeper allows a discount of 20%. Find the selling price.

Section C: Word Problems

11. A toy has a marked price of ₹2,500 and is sold for ₹2,125. Find the rate of discount.

12. Ravi scored 72% in an examination and got 432 marks. Find the maximum marks of the examination.

13. In a class of 40 students, 55% are girls. How many boys are there in the class?

14. The bill for a refrigerator before tax is ₹5,000. GST at 18% is added. Find the amount to be paid.

15. A trader bought an article for ₹500 and spent ₹50 on transport. He sold it for ₹660. Find his profit percent.

Answer Key and Solutions

Section A

1. (i) 3/8 × 100 = 37.5%
(ii) 0.045 × 100 = 4.5%
(iii) 7/20 × 100 = 35%

2. (i) 12.5% = 12.5/100 = 1/8 = 0.125
(ii) 140% = 140/100 = 7/5 = 1.4

3. (i) 15/100 × 480 = 72
(ii) 6.5/100 × 800 = 52

4. 2.5 kg = 2500 g
Percent = (400/2500) × 100 = 16%

5. Let the number be x. 40% of x = 96 → (40/100) × x = 96
x = 96 × 100/40 = 240

Section B

6. Increase = 12% of 25,000 = 3,000
New population = 25,000 + 3,000 = 28,000

7. Decrease = 800 − 680 = ₹120
Percentage decrease = (120/800) × 100 = 15%

8. Profit = 15% of 2,400 = ₹360
SP = 2,400 + 360 = ₹2,760

9. SP = 88% of CP (since loss = 12%)
CP = 1,980 × 100/88 = ₹2,250

10. Discount = 20% of 1,500 = ₹300
SP = 1,500 − 300 = ₹1,200

Section C

11. Discount = 2,500 − 2,125 = ₹375
Rate of discount = (375/2500) × 100 = 15%

12. 72% of maximum marks = 432
Maximum marks = 432 × 100/72 = 600

13. Boys = 100% − 55% = 45%
45% of 40 = 18 boys

14. GST = 18% of 5,000 = ₹900
Amount to be paid = 5,000 + 900 = ₹5,900

15. CP = 500 + 50 = ₹550
Profit = 660 − 550 = ₹110
Profit % = (110/550) × 100 = 20%
